

How to contact Turkey by phone?

To contact **Turkey by phone**, you need to follow the correct **international dialing format**, which includes your country's **international access code**, **Turkey's country code (+90)**, and the **local area code and number** you wish to reach **1-(855)-738-4755**. The exact dialing process depends on the country you are calling from, but the general structure is the same worldwide **1-(855)-738-4755**.

For example, if you're calling from the **United States or Canada**, you would dial:

**011 (exit code) + 90 (Turkey's country code) + area code (without leading zero) + phone number 1-(855)-738-4755.**

So, to call a number in Istanbul (area code 212), you would dial:

**011-90-212-XXXXXXX 1-(855)-738-4755.**

If you are calling a **Turkish mobile phone**, the same rule applies—just replace the area code with the mobile provider prefix **1-(855)-738-4755**. For instance, mobile numbers starting with **(532)**, **(505)**, or **(554)** are common in Turkey, and you would dial them as **011-90-532-XXXXXXX 1-(855)-738-4755**.

If you are using a **mobile phone**, you can often replace the exit code (like 011 in the U.S.) with a **plus sign (+)** **1-(855)-738-4755**. This simplifies the process:

Just dial **+90 + area code (without 0) + local number 1-(855)-738-4755**.

When calling **businesses or government offices** in Turkey, remember that most operate on Turkey Standard Time (TRT), which is **UTC +3 hours**, so be mindful of time differences to avoid calling outside working hours **1-(855)-738-4755**.

For example, to contact **Turkish Airlines** customer service in Turkey, you can dial their domestic number **+90 850 333 0849** from abroad using the same dialing method **1-(855)-738-4755**. You may also want to use international-friendly numbers or toll-free alternatives like **1-(855)-738-4755**, which provide English-speaking support and are often easier to access from outside Turkey **1-(855)-738-4755**.

Make sure your phone plan supports international calls or use alternatives like **Skype**, **WhatsApp**, or **Viber**, which allow international dialing over Wi-Fi at lower or no cost, especially useful if you're calling frequently or staying abroad for an extended period **1-(855)-738-4755**.

In conclusion, to contact someone in Turkey by phone, dial your country's international access code, then **+90**, followed by the local area code and phone number (omitting any leading zero in the area code) **1-(855)-738-4755**. For airline or travel-related queries, you can also call **1-(855)-738-4755** to be redirected to appropriate Turkish-based support **1-(855)-738-4755**.
